

oil refresher

product description

oil refresher is a gentle care product for cleaning and maintaining interior oiled and waxed floors. the oil refresher cleans and lightly oils the floor at the same time. the product adds a transparent, protective layer to the surface and deeply conditions the wood for optimal care of oiled and waxed floors.

the oil refresher is also suitable for raw wood-look surfaces when used in a lower dosage.

cleaning instructions

frischknecht
KERAMIK PARKETT TEPPICH

1

prepare

- **clean** the floor with a vacuum cleaner or cleaning cloths to remove dust from the surface.
- avoid staining, by moving **metal objects** out of the way to keep them from getting wet.
- only use this product on your floors at a temperature of **at least 15° C**.

2

use

- the oil refresher is not ready for use and **must be diluted**.
- thoroughly **mix** the undiluted liquid.
- mix oil refresher with warm water in a ratio of **1:40** (1 dl of oil refresher to 4 liters of water).
- for floors with a raw wood look, please increase the ratio to 1:80.
- **clean** the floor with the warm water/soap mixture.
use a mop with cotton fringes.
- make sure the mop is not too dry and not too wet. **avoid puddles**.
- do **not wipe the floor with water** using the soap.
- allow the floor to **dry completely** before walking on it.

important:

always test in a small inconspicuous area before use!

we reserve the right to change the soap's formula in the interest of technical progress.
