

GREEN BIO

Mild detergent for the cleaning of XPlus, XPlus2, NaturPlus, NaturPlus2, Naturplus2 Matt, MattPlus, Oleonature, Oleostrong and Invisible Touch finished wood flooring. For frequent use.

This product provides an efficient antistatic action against dust accumulation whilst keeping the floor clean for a longer period. The appearance is smooth and the floor looks healthy.

Made of fully biodegradable plant-based surfactants (complying to 648/2004 EC regulation).

It has a low environmental impact and avoids allergy phenomena and contact sensitivity (except for subjects allergic to specific components).

USEFUL INFORMATION

After a long period, a slight darkening effect can appear in the deeper parts of the wood (brushings, sawings, etc.) due to the accumulation of the dust. Regular maintenance of the floor will reduce this appearance.

Never wash the floor with water only: it will not efficiently clean the surface of the floor and moreover the minerals contained in water may leave behind a residue that could affect the surface appearance of the floor.

DIRECTIONS FOR USE

Remove the dust found on the floor's surface by cleaning with a vacuum cleaner equipped with a brush suitable for hardwood floors; this is a very important operation in order to remove the solid dust that could worn the surface.

Shake well.

Dilute 2 cups of Green Bio Listone Giordano (100 ml approximately) in a 5 l bucket of water.

Immerse a lint free soft cotton rag in the solution; use a cloth that will not leave fibre residues even on the special surfaces as "Traccia" or "Filo di lama"; wring well to remove excess liquid and pass it over the floor's surface using a long-handled floor brush/mop.

Wash the rag in cleaned water in order to avoid dragging the dirt on the floor.

No need to rinse.

1 litre of product is sufficient for washing approximately 8 times a surface area of 100 m².

In case of tough dirt, wash the floor with Green Bio Listone Giordano in double dose.

Never exceed this concentration.

After opening the tin, the product has to be used within 12 months.

The most of the tin is made in recycled material and can be fully disposed in the plastic container.

Green Bio can be used in the same dose also on other floor surfaces as ceramic tiles, porcelain gres (stoneware) and cotto tiles; in this case it's advisable try the product in a small area before applying it all over the floor.
